

## **Annotation**

Master's work refers to the geographical cartometric analysis of Ivane Javakhishvili historical map of Georgia of 1923.

The aim of the work is to analyze and reveal changes of borders of the map ( I century BC. XII century AD. 1783 AD ). Communal divisions, number and location of geographical objects ( settlements, cult and fortification buildings ).

With the support of program ArcGIS we have defined peculiarities of space distribution of territorial-administrative units of Georgia, data of its area, also distribution of the objects existing on the map according to communities. The results achieved are presented by thematic maps and diagrams.
